**Hiking the Southwest** - Dave Ganci 1983

Describes the geography and climate of the Southwest, provides information on the distance and points of interest along hiking trails, and includes tips on no-trace camping

**Enchantment and Exploitation** - William deBuys 2015-11-15

First published in 1985, William deBuys’s Enchantment and Exploitation has become a New Mexico classic. It offers a complete account of the relationship between society and environment in the Sangre de Cristo Mountains of northern New Mexico, a region unique in its rich combination of ecological and cultural diversity. Now, more than thirty years later, this revised and expanded edition provides a long-awaited assessment of the quality of the journey that New Mexican society has traveled in that time—and continues to travel. In a new final chapter deBuys examines ongoing transformations in the mountains’ natural systems—including, most notably, developments related to wildfires—with significant implications for both the land and the people who depend on it. As the climate absorbs the effects of an industrial society, deBuys argues, we can no longer expect the environmental future to be a reiteration of the environmental past.

**Bibliography of New Mexico Geology and Mineral Technology** - 1973

**Bibliography and Index of Geology** - 1990
Trail guide to geology of the Upper Pecos - Patrick K. Sutherland 1989
